

V2.0.3 Release Note – 31 January 2020

■ Feature Enhancements and Bug Fixes

No.	Summary	Type	Description
1.	Import Study eDT Specs from Excel	Feature Enhancement	Import Excel feature at Create New eDT Spec and at Create New Version has been added. The following column labels have been changed. - COLUMN: Column Role => Column Name - COLUMN: Source Test Name (removed) - CODELIST: Data Type => DataType - CODELIST: Language => xml:lang
2.	Pulldown values of Analysis Purpose and Analysis Reason	Feature Enhancement	Analysis Purpose and Analysis Reason codelists were moved from ADaM Terminology to Define-XML Terminology since 2019-12-20. The system now shows their pulldown values from the system-wide master.
3.	Insufficient menus available to Editors	Bug Fix	Some menu buttons on the Manage Study Metadata screen which should have been available to Editors were hidden incorrectly.
4.	Project cannot be deleted	Bug Fix	Business Administrator can now delete project when it is empty.
5.	Slow load of standard CRF Field screen	Bug Fix	Slow load of the standard CRF Field screen has now been fixed.
6.	BC/ARM cannot be created under the same Study ID in a different project.	Bug Fix	Biomedical Concept (BC) or Analysis Result Metadata (ARM) could not be created when there is already a BC or ARM under a study of the same ID in a different project.
