

## V2.4.2 Release Note – 23 Oct 2021

### ■ Feature Enhancements and Bug Fixes

| No. | Summary  | Type    | Description   |
|-----|--|---------|---|
| 1.  | "Is SUPP" is not marked when NSV is added to SDTM Standard     | Bug Fix | The "Is SUPP" column of a non-standard variable (NSV) was not marked with "Yes" when it was added to an organizational SDTM standard. The issue has now been fixed.   |
| 2.  | Undesirable Display Order of SDTM Datasets in My SDTM Standard | Bug Fix | Datasets in My SDTM Standard (i.e. an organizational SDTM standard) was displayed in chronological order. Also, datasets in a SDTM Spec created from My SDTM Standard was displayed in alphabetical order. They are now ordered as desired in Define-XML. |
| 3.  | Error at AutoMap with My SDTM-CT                               | Bug Fix | AutoMap failed when My SDTM-CT (i.e. an organizational SDTM terminology) containing a new item with certain blank properties was associated with the SDTM spec. The issue has now been fixed.   |

### ■ Known Issues, Limitations

| No. | Summary  | Description  |
|-----|--|--|
| 1.  | Slow Show/Hide operation with Internet Explorer 11 | The Show/Hide Details button works slow with Internet Explorer 11. |
