V2.6.5 Release Note – 19 Mar 2023

■ **Feature Enhancements and Bug Fixes**

No.	Summary	Type	Description
1.	Extra Variable is ordered incorrectly upon variable update	Bug Fix	Extra Variables inserted "Below" in the Variable Mapping page were repositioned immediately after the top variable when the dataset variables were updated on the Variable page. The issue has been fixed.
2.	Duplicate auto-assignment of Group ID in Dataset Mapping	Bug Fix	Group ID assigned automatically in the Dataset Mapping page could duplicate with existing Group IDs. The issue has been fixed.
3.	Concept Mapping cannot be removed	Bug Fix	A concept mapping defined in the Concept Mapping page was not able to be removed. A "Clear" button has been added on the Find Biomedical Concept dialog to allow removing an existing concept mapping.
